NOTES:

Prior to any fill placement, all areas which will receive structural fill, shall be excavated to firm, non-organic, undisturbed native ground. Observation or inspection by a geotechnical engineer may be required.

Placement of structural fill will require compaction testing by an accredited testing agency.

All cut and fill slopes shall not exceed 2:1 slopes unless soils engineering is provided.

All exposed and un-worked soils shall be stabilized by suitable application of erosion control BMP'S.
